PROFESSIONAL SUMMARY

My whole life so far, I have worked in the construction field. I am currently in the process of switching my career to be a Software engineer. I am in my second year at Brookdale Community College, I plan on transferring to Monmouth University to then get my B.S. in software engineering. Programming is something I am extremely passionate about. I spend all my free time learning and applying new concepts and ideas to my own personal projects. I am beyond eager to break into the industry and start a career at a company that I would enjoy waking up and going to each and every day.
